Another good OGF for NGS

OGF26 in Chapel Hill, NC, US, was fairly small by OGF standards, but it was yet another productive one.

It is interesting to have both industry and academic input, because we obviously have different priorities. This has turned out to be a positive outcome of the merger between the then OGF and EGA. Also interesting now is the interaction between the OGF and OGC who themselves have large and diverse communities - I see a potential for lots of fruitful collaborations.

Apart from our very own David Wallom being made VP of e-Research, I was made Area Director for security. This is an interesting challenge which I look forward to. For one thing, there are numerous security related projects building things for the NGS, and being able to chase them about using standards - or creating them when they don't exist - will be useful. Also interestingly, I had been given a grid security shopping list by some industry contacts.

- The Storage Resource Manager (GSM-WG) made progress with standardisation of SRM 2.2.
- More talk about digital repositories (more about this later), and a new research group is formed (DR-RG). The RODS folks are also involved in this. [RODS](#) here is the next generation of data and SRM having the

Flying to Berlin!

GridTag

GridTalk and GridCast are heading to HealthGrid 2009 in Berlin later this month to find out how grid technologies are helping in biomedical research, education and medical care.

We'll be blogging all about the event as well as filming all the action from the conference for you to enjoy without having to leave your own office.

But if any of you are heading over to Germany too we'll love to know! [Get in touch](#) and you could join our blogging team live from the conference.

For everyone else stay tuned on the 29 June - 1 July to see how it goes.

HealthGrid 2009 CONFERENCE BERLIN

Meet The GridCast Bloggers

Bloggin' in grids about the world

Just back from Catania, Italy, where we covered the [POPP Local Europe - OGC25](#) and [OGC Europe](#).

- 4 Feeds

- @enablinggrids
- @gridtalk
- @gridpp
- @planet_gridpp

- VideoCasting run by the GridTalk project
 - Talks, Demos and Interviews

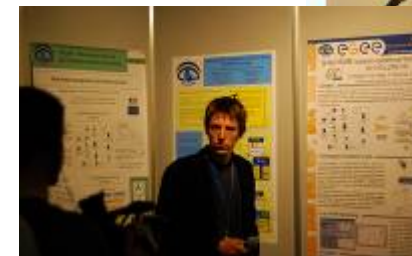

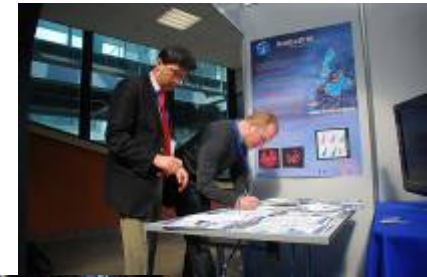

- GridPP and EGEE YouTube channels
 - Talks, presentations and professional video

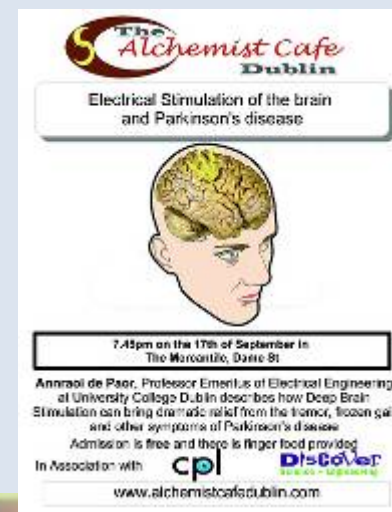

- Use tags to create a photo montage of an event
 - New idea have used this only once at the EGEE User Forum

- Technical News/Discussion
 - <http://planet.gridpp.ac.uk>; blog aggregator of all the technical blogs from around the UK
- Community News
 - GridCast blog, Twitter
- Community Events
 - Large community events combine blogs (GridCast), Twitter (hashtag), Flickr (event tag) as well as video casting

- Alchemist Café
 - Dublin-based Café Scientifique, running since July 2004
 - Uses Twitter, Flickr, "Blog" and Video Podcasts
- Science London
 - Central London branch of the British Science Association
 - Uses Twitter, Facebook and Flickr
