## The British Science Festival Student Bursary Scheme

The British Science Festival is Europe's largest annual public science event bringing you the latest science, technology and engineering. The Festival bursary scheme offers universities and companies the opportunity to sponsor students of their choice to meet leading scientists and speakers, engage in debate and discussion about the impact of science in society and enjoy the atmosphere of an event heavily covered by the media.

This year the Festival will be hosted by Aston University, from 14 -19 September, with events taking place across Birmingham. Sponsors can purchase bursary packages at £350 each. This price includes Festival registration, accommodation and food for the week.

*'Well worth it. The package includes meeting extraordinary people and gaining invaluable advice and knowledge. If offered one should not refuse the opportunity to go.'*  
(Student bursary attendee 2009)
